

For our Application-Team in **Krefeld** we are looking for a

Process Engineer (m/f/d) – Food Applications

Reference number: 84/2024

Our benefits:

- A varied and challenging job in an international, successful and economically stable company where your commitment is valued
- Personal development through further training programs
- Working in a motivated team that supports and trains you
- 30 days of vacation
- The possibility of mobile working
- Company pension plan and long-term accounts
- Free parking and subsidies for train tickets and company bicycles
- Subsidy for the canteen, Company Fitness

Your responsibilities:

- Conducting market and customer process analyses to evaluate new business possibilities in the field of food applications for industrial gases
- Supporting and conducting development projects in collaboration with our countries, customers and partners in the food and sustainable cooling transport segment
- Designing and conducting audits, R&D projects and tests using liquid and industrial gases in our technical center in Krefeld and externally at international customers, e.g. from the food industries
- Growing our food segment towards the next level via networking, internal/external training, fairs, social media, etc.

Your qualifications:

- Degree in process food or chemical engineering or training in a food environment with further training as a technician (m/f/d)
- Professional experience in the above-mentioned field is an advantage
- Manual dexterity and safe handling of machines and systems
- Good written and spoken German, English and business fluent French skills
- Willingness to travel (approx. 30-40%)
- Methodical and proactive way of working

Do you recognize yourself in this position and are you interested?
